Quick Guide: How to Create and Submit a Proposal

1. **Access the system**
   Go to: **https://it.dsv.su.se/projectproposals**
2. **Create a new proposal**
   Click **Create New Proposal** to create a new proposal.
3. **Fill in the required information**
   The proposal form is divided into sections, and each section contains a few mandatory fields that must be completed. Please ensure that all required fields in the proposal form are filled in.

   You must upload **both a proposal draft and a budget file**. These can be uploaded at a later stage, but the proposal will not be sent into the workflow until all required information and files have been provided.

   If you are unsure how to complete a specific field, you can click the information icon to open a help modal with additional guidance.

4. **Submit the proposal**
   When the proposal is complete, click **Request Approval** to submit. The proposal will then enter the review workflow.
5. **Follow the review process**
   You can track the status of your proposal in **My Proposals**. If additional information is requested, you will be notified and can update the proposal accordingly.

Instructions for Creating a Proposal Draft

Before you begin

Budget template
Before you begin filling out the form, it may be helpful to download the budget template. The Excel file helps you calculate the project budget and supports your application preparation.

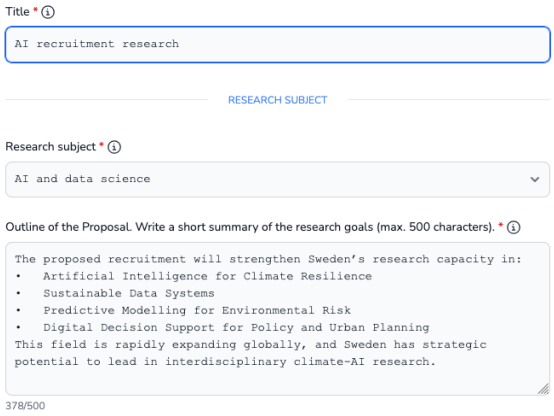
Progress indicator
A progress indicator is displayed at the top of the form. It shows how far you have come in the workflow and updates as you edit or review content.

1. Proposal Information

Proposal Title (working title is acceptable)
In the first section of the form, you enter a title (working title or equivalent) for your application.

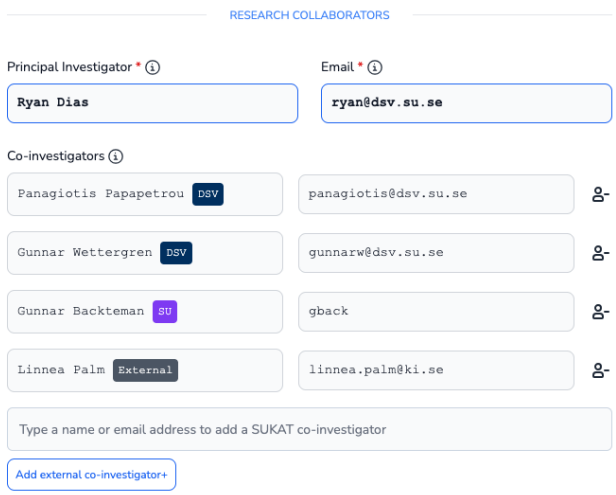
Research Area (using the dropdown menu)
You then specify the research area it belongs to using the dropdown menu.

Brief Proposal Outline (max. 500 characters; a counter is provided)
Provide a brief outline of your proposal. The outline should be limited to 500 characters (a counter is available to help you stay within the limit).



2. Research Collaborators

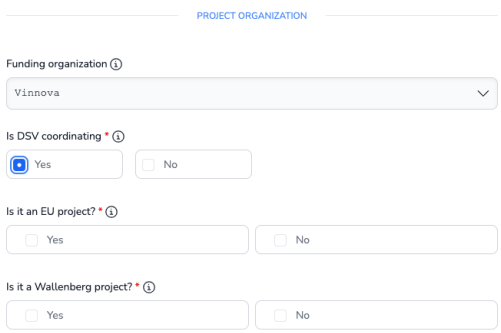
In the next section, you will see pre-filled fields with your name and email address. Here, you can add intended project collaborators. You may select both **internal (SUKAT)** and **external collaborators**. When adding an external collaborator, you must enter their name and email address and then save the information.



3. Project Organisation

In this section, you must specify which funding organisation you intend to apply to for a grant and indicate whether DSV will act as the coordinating institution. If not, please state which organisation will coordinate the project.

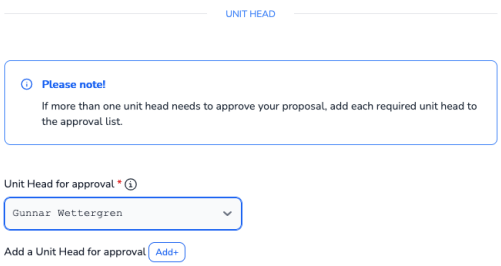
You must also indicate whether the project is an **EU** or **Wallenberg** project, as special regulations apply to these types of projects.



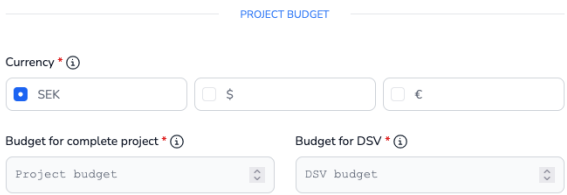
4. Unit Head for Approval

In this section, you must specify your unit head and, if applicable, the unit heads of any collaborators who belong to other units. Please note that only unit heads of **internal** collaborators should be included.

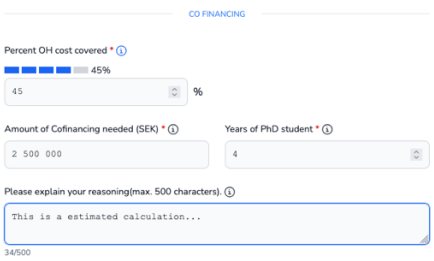
The application will be sent to all unit heads listed here for approval before it can proceed to the next stage of processing.



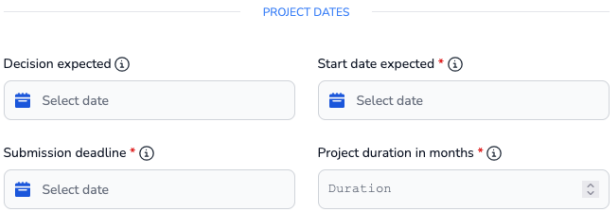
5. Project Budget
In this section, you must enter the budget for your proposed project. The budget should be provided as the full total budget for the entire project, as well as DSV's share. Please also specify whether the amounts are stated in SEK, EUR, or USD.



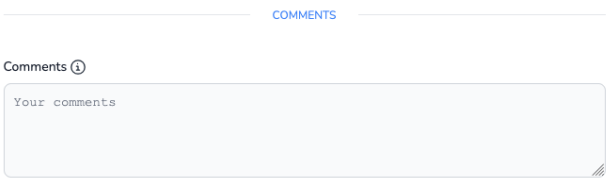
6. Co-financing
In this section, you specify the overhead costs and whether co-financing will be required, as well as the number of years of funding for a PhD student. Please provide a brief justification explaining your reasoning.



7. Project Dates
In this section, you enter the expected date when a decision will be communicated by the funding organisation, as well as the anticipated project start date. You should also specify the application deadline and the expected duration of the project.

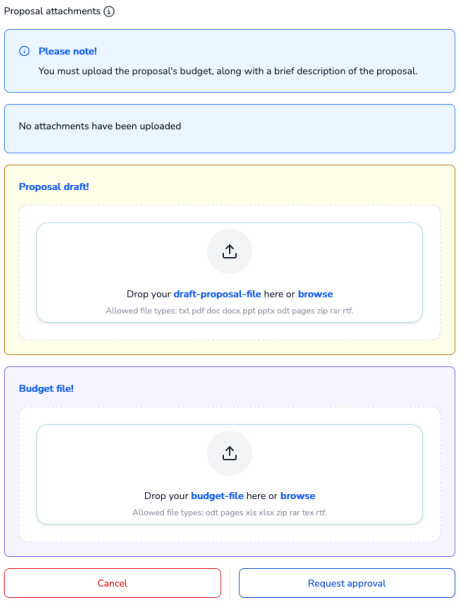


8. Comments
Finally, you may use this section to add any additional comments or information that should be included.



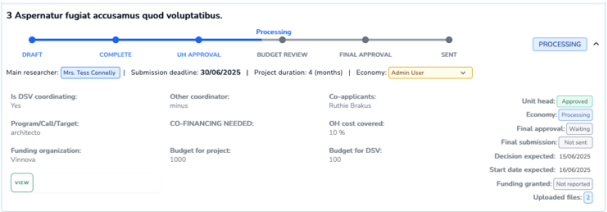
9. Proposal Attachments

In this section, you upload a draft proposal file and a budget file in the respective fields. These attachments must be provided in order for the application to be forwarded for further processing.
You may also choose to upload these files at a later stage; however, until they have been added, the proposal will not be submitted for review.



Submission and Tracking

Once you have submitted your proposal, it will be forwarded to the relevant functions for further processing.
You can track the status of your application on the start page.



Saving a Proposal Without Submitting
You may save your proposal at any time without submitting it.

- Use the **Save Draft** button located at the bottom of the form.
- Saving a draft allows you to return later to continue editing without sending the proposal for approval or processing.
- Saved drafts remain visible on your start page under **My Proposals**.
- You may reopen a draft at any time, make updates, add attachments, or delete it if no longer needed.

A proposal will *not* be submitted until you explicitly click **Submit Proposal**.

Reporting Sent, Granted, or Rejected Proposals
After you have submitted your proposal, you need to report the outcome once a decision has been communicated by the funding organisation.

Reporting a Sent Proposal
If your proposal has been submitted to a funding organisation (external submission):

- Navigate to **My Proposals** on the start page.
- Locate the proposal and click to expand the accordion with an overview of the proposal.
- Click on the **Report Sent** button.
- Upload the final application documentation.
- Save your update. The proposal will now display the status **Sent**.

Reporting a Granted Proposal
If your project has been approved for funding:

- Navigate to **My Proposals** on the start page.
- Locate the proposal and click to expand the accordion with an overview of the proposal.
- Select the **Granted** button.
- Enter details such as granted amount and any attachment (e.g., decision letter).
- Save your update.
  The proposal status will change to **Granted** and will be forwarded to the vice and DSV -registrar.

Reporting a Rejected Proposal
If your proposal has been declined:

- Navigate to **My Proposals** on the start page.
- Locate the proposal and click to expand the accordion with an overview of the proposal.
- Select the **Rejected** button.
- If applicable, upload the rejection notice/letter.
- Save your update.
  The proposal status will change to **Rejected**, and it will be archived for documentation.
